

**MARQUETTE SCHOOL OF DENTISTRY**

## A LEADER IN DENTAL EDUCATION

**TIME TO RISE**

THE MARQUETTE PROMISE TO BE THE DIFFERENCE

**MARQUETTE  
UNIVERSITY**

As Wisconsin's only dental school, the Marquette University School of Dentistry prides itself on providing services for all. The school treats more than 30,000 unduplicated patients across Wisconsin each year and serves as one of the state's largest Medicaid providers, working with financially disadvantaged and special needs patients. We educate the next generation of outstanding dental clinicians who help serve our communities.

In addition to its academic and clinical excellence, the dental school reflects Marquette's pillar of service by providing nearly half a million dollars in discounted and, in some cases, emergency free care to those in need. At last count, the dental school provided care in 66 of the state's 72 counties.

## LEADERSHIP GIVING OPPORTUNITIES

**\$500K+ - Support the dental school's special needs patients and student training through the creation of a special needs excellence fund.** This would help fund faculty as well as equipment, technology and other needs specific to special needs dentistry.

**\$100K-\$4M - Champion the renovation of our dental clinics through a variety of naming opportunities.** We have begun a phased renovation across our four main on-campus clinics to ensure our students learn in the most current facilities. Support for this undertaking is a substantial opportunity to establish a visible dental legacy at Marquette.

## TOP GIVING OPPORTUNITIES

**\$250K - Ensure Marquette dental students are prepared to identify, master and apply the very best oral health care technology by establishing an Advanced Technology and Innovations Excellence Fund.** School of Dentistry graduates will be practicing for 30 or more years into the future. We seek to create an excellence fund that will support new and developing technologies, including digital scanning, laser applications, 3D printing, treatment planning and CAD/CAM technology.

**\$100K - Model Marquette's pillar of service by endowing an overall patient care fund** that empowers the School of Dentistry to provide care for uninsured individuals or those who cannot receive care elsewhere. The unfunded patient care our school provides to Wisconsin's most vulnerable populations is in exceedingly high demand.

**\$100K - Champion our world-class dental faculty and departments through a Marquette University School of Dentistry excellence fund.** The quality education the dental school provides its students is directly related to the quality of the individuals instructing them. An excellence fund would give our faculty resources to conduct and present research, fuel a faculty innovation group to enhance the educational quality of our programs and support departments in refreshing the dental curricula to prepare Marquette dental graduates for the challenges of contemporary and future clinical practice.

### Change lives through scholarship

Scholarship support remains a top university-wide priority. Be the Difference for students through endowed and current use scholarships.
